COVID-19 Testing of People Incarcerated in MN Prisons (updated 4/10/20)

The DOC is following the Minnesota Department of Health testing guidelines for monitoring, isolation/quarantine, and testing of the people incarcerated in our facilities. However, we are not waiting for positive test results to take appropriate precautions. If an incarcerated person exhibits symptoms consistent with COVID-19, we follow MDH guidance for how our health care and other staff are PPE and interact with those individuals, how to isolate and quarantine them, and how to protect the health of everyone involved.

Please note: As of 4/9/20, we have added a column for incarcerated individuals who are "presumed positive" for COVID-19. Following Minnesota Department of Health guidelines, these are individuals who have both (1) exhibited symptoms consistent with COVID-19 and also (2) had close contact with someone who was confirmed positive for COVID-19 through testing. According to Minnesota Department of Health protocol, these individuals are presumed positive, are not tested, and are treated and cared for the same as though they did test positive. These cases have been part of DOC's planning from the beginning.

	Patients Tested	Confirmed Positive	Confirmed Negative	Test Pending	Presumed Positive*	Patients Released	Deaths
Total	1	0	1	0	0	0	0
Moose Lake	20	0	1	0	0	0	0
East City	0	0	0	0	0	0	0
St. Cloud	0	0	1	0	0	0	0
Livingston	7	0	0	1	0	0	0
St. James	2	0	2	0	0	0	0
Oak Lake Heights	0	0	0	0	0	0	0
Shakopee	0	0	0	1	0	0	0
LeRoy	0	0	0	1	0	0	0
Jeffrey Street	1	0	0	1	0	0	0
Red Wing	1	0	1	0	0	0	0
Total	40	0	34	6	0	0	0

* Presumed Positive individuals presumed positive based on symptoms and having close contact to a person confirmed positive through testing.

COVID-19 and Visiting

ALL VISITING SUSPENDED: All in-person visiting has been suspended until further notice.

We are working closely with the Minnesota Department of Health and the Department of Public Safety to monitor the ongoing COVID-19 ("coronavirus") developments.

While many COVID-19 cases seem to be mild to moderate with symptoms similar to colds and flu, some cases may be more severe. People who think they may have been exposed to COVID-19 should contact their healthcare provider before going into the clinic. Share with them your symptoms as well as any travel history or other information about potential COVID-19 exposure.

Personal Planning and Preparation

(<https://www.health.state.mn.us/diseases/coronavirus/action.html>)

For up-to-date information, visit the websites of the Minnesota Department of Health (<https://www.health.state.mn.us/covid.html>) and the Centers for Disease Control and Prevention (CDC) (<https://www.cdc.gov/coronavirus/2019-ncov/index.html>). The best guidance for avoiding COVID-19 is to take the same precautions you take for avoiding colds and flu.

1. Stay home when sick.
2. Wash your hands thoroughly and frequently with soap and water for at least 20 seconds at a time.
3. Cover your coughs and sneezes with your sleeve or a tissue, not your hand. Throw the tissue away when you are done.
4. Stay informed. Visit the MDH and CDC websites often.
