Please note: As of today pending, positive, and negative offender test numbers reflect the current physical location of the offender.

Offender Population

Medical Restriction: Used to separate and restrict the movement of **well** persons who may have been exposed to a communicable disease to see if they become ill. These people may have been exposed to a disease and do not know it, or they may have the disease but do not show symptoms. Medical restriction can help limit the spread of disease.

Medical Isolation: For people who are **sick and contagious**. Isolation is used to separate ill persons who have a communicable disease from those who are healthy. Isolation restricts the movement of ill persons to help stop the spread of disease.
